Right away it doesn't seem like much, this will most likely be overlooked because of the lack of experience that I have for the field and I totally get it. What you don't know is that I'm willing to put in the work to learn and grow. If I run into a problem, I will do my best to try to solve it on my own before asking someone for help. For the past couple of years Google and YouTube have been my best friends in learning new skills and for finding solutions or clues to my problems that I run into. Positivity plays a big role in my life, I'm always moving forward and with a 100% attitude. I know the knowledge isn't there, **yet**, but if you're interested in finding out more about me and would be willing to give me 2-5 minutes of your time to chat, I'd be more than honored.
