TECHNICAL SKILLS

HTML, CSS3, Canvas, BootStrap, JavaScript, jQuery, AJAX, API, Angular, Express, Node, Python, Flask, MySQL, PHP, C#, ASP.NET, GitHub, AWS EC2, NW.js, Adobe Illustrator, Adobe XD, Adobe Photoshop

TECHNICAL PROJECTS

Strive Together - Live site built in response to Covid-19

CSS / JavaScript / jQuery / AJAX / C# / ASP.NET / Entity Framework / MySQL

- Collaborated in a 3 person team as the Front-end developer, providing a responsive experience across different devices and connecting front-end functionalities to the back-end
- Integrated client-side validations with HTML and server-side validations with Bcrypt to enhance security
- Designed UI with CSS and Javascript for a seamless and engaging user experience

Tying the Knot - Wedding planning web-app

CSS / JavaScript / jQuery / C# / ASP.NET / Entity Framework / MySQL

- Constructed the database with MySQL, utilizing many-to-many relationships to track the number of events a user creates and how many guests an event contains
- Configured the user password to be encrypted by using Bcrypt and hashing to increase security
- Implemented Google API to generate a map of event location the user provides through form submission

Breakout - Inspired from the popular Breakout Game

Canvas / CSS / JavaScript / Node / NW.js

- Integrated Canvas to create the visuals of the game and JavaScript for functionality
- Configured the app with Node to create dependencies and folder structure
- Implemented NW.js, to allow me to deploy the game as a desktop app for different OS

EXPERIENCE

Logistics Coordinator & Designer - Expert Coating & Graphics / Sept 2018 - Nov 2019

- Assessed, monitored inventory control and decreased the risk of having inadequate materials being processed saving the company time and money
